

Before testing again, you can choose one of these options to help you prepare.

1 Complete online modules at your own pace that will refresh you on the skills included in the ACCUPLACER College Entrance Test.

The testing staff can set you up to complete test preparation materials using a program called PLATO. After completing the modules you may schedule to retest with the testing center.

or

2 Complete a 1 to 2 hour face-to-face test preparation class.

Dean Tom Feagle and other faculty will hold test preparation courses on each campus prior to the beginning of the semester. The classes will be broken down into three sections – Arithmetic, Algebra and Reading/Writing. You may register to attend all or one depending on the areas you need a refresher in. To register for a session go to <http://bit.do/TestPrep> or scan QR code below. Students will need to plan to retest either in the afternoon after the sessions or the next day in order to have time to register for classes.
