

RADIOLOGIC TECHNOLOGY

The American Registry of Radiologic Technologists (ARRT) recognizes the Radiologic Technology program. Graduates are eligible to apply to sit for the Radiography examination of the ARRT.

The Radiologic Technology program at Wiregrass Georgia Technical College is a Joint Review Commission on Education in Radiologic Technology (JRCERT) accredited program. Contact information for the JRCERT is:

MISSION STATEMENT

The mission of the Radiologic Technology Program is to provide its students, through didactic and clinical experiences, the knowledge, skills, and attitudes to acquire and retain entry level positions in the medical imaging field.

GOALS AND STUDENT LEARNING OUTCOMES

Upon graduation from the WGTC Radiologic Technology Program:

1. Students will develop critical thinking skills.
 - a. Students will integrate critical thinking skills in the areas of image evaluation criteria and image quality.
 - b. Students will integrate critical thinking skills by modifying radiographic exams to meet the needs of the patients.
2. Students will demonstrate communication skills.
 - a. Students will express effective oral presentation skills at a satisfactory level.
 - b. Students will compose effective written communication skills at a satisfactory level.
3. Students will be clinically competent.
 - a. Students will manipulate various radiographic equipment.
 - b. Students will apply appropriate positioning skills.
 - c. Students will demonstrate adequate radiation safety.
4. Students will model professionalism.
 - a. Students will practice professionalism in their appearance and work.
 - b. Students will synthesize their programmatic learning with continuing education in maintaining professional standards.
5. Students will demonstrate math competency.
 - a. Students will demonstrate math competency in the related math component for radiologic technology
