

RADIOLOGIC TECHNOLOGY

The American Registry of Radiologic Technologists (ARRT) recognizes the Radiologic Technology program. Graduates are eligible to apply to sit for the Radiography examination of the ARRT.

The Radiologic Technology program at Wiregrass Georgia Technical College is a Joint Review Commission on Education in Radiologic Technology (JRCERT) accredited program. Contact information for the JRCERT is:

MISSION STATEMENT

The mission of the Radiologic Technology Program is to provide its students, through didactic and clinical experiences, the knowledge, skills, and attitudes to acquire and retain entry level positions in the radiology technology field.

GOALS AND STUDENT LEARNING OUTCOMES

Upon graduation from the WGTC Radiologic Technology Program:

1. Students will develop critical thinking skills.
 - a. Students will properly evaluate chest radiographic images.
 - b. Students will manipulate technical factors for non-routine examinations for trauma hip.
2. Students will demonstrate effective communication.
 - a. Students will demonstrate effective oral communication skills by obtaining pertinent patient history information and explaining the procedure to the patient.
 - b. Students will demonstrate written communication skills when entering patient history information.
3. Students will be clinically competent.
 - a. Students will demonstrate proper equipment manipulation skills.
 - b. Students will demonstrate an understanding of correct positioning skills during lab performance by utilizing proper central ray placement.
 - c. Students will demonstrate an understanding of proper radiation protection methods.
4. Students will demonstrate appropriate math competency in the related math component for radiologic technology.
